

Prince George's County Community Health Center

Community Health Centers are health clinics with locations in many of your communities. Health Centers provide many health services including: physical exams, lab tests, treatment for common conditions (high blood pressure, sugar/diabetes, high cholesterol and heart disease) and women's health care. Many provide behavioral health care, nutrition counseling and other services that you and your family may need. Most serve children and can provide vaccinations.

Licensed doctors, nurse practitioners, physician assistants, nurses and social workers will listen to you and provide you with the best treatments possible in language that you can understand. Community Health Centers must meet the highest standards of care.

Community Health Centers accept Medicaid, Medicare and most insurance. If you don't have health insurance, Health Centers charge fees based on your income and ability to pay. No one will be turned away. If you or a family member need a doctor, call today to make an appointment.
